Notice of Allowability	Application No.	Applicant(s)	
	10/765,659	CICCHIELLO, JAMES M.	
	Examiner	Art Unit	
·	Thomas J. Mullen, Jr.	2612	<u></u>
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.			
1. A This communication is responsive to the amendment filed	<u>12/4/06</u> .	•	
2. The allowed claim(s) is/are <u>1-37</u> .

9. 🗌 Other ____.

Application/Control Number: 10/765,659

Art Unit: 2612

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce Brunda on 12/29/06.

IN THE CLAIMS

Claim 26, line 2, after "beam" (second occurrence) has been inserted --comprising an optical signal--.

Claim 26, line 4, "an optical signal" has been changed to --the optical signal--.

Claim 32, next-to-last line, after "according" has been inserted --to--.

- 2. The following is an examiner's statement of reasons for allowance: the art of record fails to teach or suggest--
- (i) an optical tag comprising a photo-detector responsive to incident optical energy at a predetermined wavelength, a controller, a battery, and a piezoelectric translator, the photo-detector, controller, battery and piezoelectric translator being in electrical communication with each other, and a reflective tape in mechanical communication with the piezoelectric translator;
- (ii) an optical tag comprising a piezoelectric translator operative to generate a pulse when an optical energy at a predetermined wavelength is incident on the tag, and a retro-reflective tape in contact with the piezoelectric translator and being operative to modulate phase of the optical energy according to the pulse generated by the piezoelectric translator and retro-reflect the modulated optical energy incident thereon;
- (iii) an interrogating system comprising an interrogating beam source operative to scan an interrogating beam comprising an optical signal with a predetermined wavelength through a field, and an optical tag operative to respond to the optical signal with an identification code and comprising a piezoelectric translator operative to generate a pulse for modulating the optical signal, and a retro-reflective tape operative to modulate the optical signal with the identification code according to the pulse and retro-reflect the modulated optical signal back to the interrogating beam source; or

Art Unit: 2612

(iv) a method of interrogating a target from an airborne platform comprising generating an optical signal at a predetermined wavelength, converting the optical signal into a photocurrent, generating a pulse in response to the photocurrent, modulating the optical signal with an identification according to the pulse, and retro-reflecting the modulated optical signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas J. Mullen, Jr. whose telephone number is 571-272-2965. The examiner can normally be reached on Monday-Thursday from 6:30 AM to 4 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Wu, can be reached on (571) 272-2964. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-2600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
